National Highway Traffic Safety Administration

# TRAFFIC SAFETY FACTS 2020

*A Compilation of Motor Vehicle Crash Data*

# 2020 NATIONAL STATISTICS

## POLICE-REPORTED MOTOR VEHICLE CRASHES

Fatal.....	35,766
Injury.....	1,593,390
Property-Damage-Only.....	3,621,681
<b>Total.....</b>	<b>5,250,837</b>

## TRAFFIC CRASH VICTIMS

	<b>Killed</b>	<b>Injured</b>
<b>Occupants.....</b>	<b>25,536</b>	<b>2,093,246</b>
Drivers.....	19,519	1,545,689
Passengers.....	5,966	546,822
Unknown.....	51	735
<b>Motorcyclists.....</b>	<b>5,579</b>	<b>82,528</b>
<b>Nonoccupants.....</b>	<b>7,709</b>	<b>106,241</b>
Pedestrians.....	6,516	54,769
Pedalcyclists.....	938	38,886
Other/Unknown.....	255	12,586
<b>Total.....</b>	<b>38,824</b>	<b>2,282,015</b>

## OTHER NATIONAL STATISTICS

Vehicle Miles Traveled.....	2,903,622,000,000
Population.....	329,484,123
Registered Vehicles.....	297,644,334
Licensed Drivers.....	228,195,802
Economic Cost of Traffic Crashes (2010) (estimate for reported and unreported crashes).....	\$242 billion

## NATIONAL RATES: FATALITIES

Fatalities per 100 Million Vehicle Miles Traveled.....	1.34
Fatalities per 100,000 Population.....	11.78
Fatalities per 100,000 Registered Vehicles.....	13.04
Fatalities per 100,000 Licensed Drivers.....	17.01

## NATIONAL RATES: PEOPLE INJURED

People Injured per 100 Million Vehicle Miles Traveled.....	79
People Injured per 100,000 Population.....	693
People Injured per 100,000 Registered Vehicles.....	767
People Injured per 100,000 Licensed Drivers.....	1,000

# Traffic Safety Facts 2020

## *A Compilation of Motor Vehicle Crash Data*

**National Highway Traffic Safety Administration**  
National Center for Statistics and Analysis  
Washington, DC 20590

### Suggested APA Format Citation:

National Center for Statistics and Analysis. (2022, October). *Traffic safety facts 2020: A compilation of motor vehicle crash data* (Report No. DOT HS 813 375). National Highway Traffic Safety Administration.

### **For More Information:**

Motor vehicle traffic crash data are available from the National Center for Statistics and Analysis (NCSA), NSA-230. NCSA can be contacted at [NCSARequests@dot.gov](mailto:NCSARequests@dot.gov) or 800-934-8517. NCSA programs can be found at [www.nhtsa.gov/data](http://www.nhtsa.gov/data). Additional data tools, such as the State Traffic Safety Information (STSI), Fatality and Injury Reporting System Tool (FIRST), fact sheet data visualizations, and more can be found at <https://cdan.nhtsa.gov/>. To report a vehicle safety-related problem or to inquire about safety information, contact the Vehicle Safety Hotline at 888-327-4236 or [www.nhtsa.gov/report-a-safety-problem](http://www.nhtsa.gov/report-a-safety-problem).

Fact sheets available from NCSA are *Alcohol-Impaired Driving, Bicyclists and Other Cyclists, Children, Large Trucks, Motorcycles, Occupant Protection in Passenger Vehicles, Older Population, Passenger Vehicles, Pedestrians, Rural/Urban Comparison of Traffic Fatalities, School-Transportation-Related Crashes, Speeding, State Alcohol-Impaired-Driving Estimates, State Traffic Data, Summary of Motor Vehicle Crashes, and Young Drivers*. The fact sheets and annual *Traffic Safety Facts* reports can be found at <https://crashstats.nhtsa.dot.gov/>.

# TABLES

## TRENDS: General

1. Crashes, by Crash Severity, 1988-2020 .....	19
2. People Killed and Injured and Fatality and Injury Rates per Population, Licensed Drivers, Registered Vehicles, and VMT, 1966-2020 .....	20
3. Vehicles Involved in Crashes and Involvement Rates per VMT and per Registered Vehicle, by Vehicle Type and Crash Severity, 1975-2020.....	23
4. People Killed and Injured, by Person Type and Vehicle Type, 1975-2020 .....	26
5. Drivers Involved in Crashes and Involvement Rates per Licensed Driver, by Sex and Crash Severity, 1975-2020.....	28

## TRENDS: Occupants

6. Motor Vehicle Occupant and Motorcyclist Fatality and Injury Rates per Population, by Age Group, 1975-2020 .....	32
7. Passenger Car Occupants Killed and Injured and Fatality and Injury Rates per Registered Vehicle and VMT, 1975-2020 .....	34
8. Light-Truck Occupants Killed and Injured and Fatality and Injury Rates per Registered Vehicle and VMT, 1975-2020 .....	36
9. Large-Truck Occupants Killed and Injured and Fatality and Injury Rates per Registered Vehicle and VMT, 1975-2020 .....	38
10. Motorcyclists Killed and Injured and Fatality and Injury Rates per Registered Vehicle and VMT, 1975-2020 .....	40

## TRENDS: Large-Truck-Related

11. People Killed and Injured in Crashes Involving Large Trucks, by Person Type and Crash Type, 1975-2020.....	42
--	----

## TRENDS: Nonoccupants

12. Nonoccupant Fatality and Injury Rates per Population, by Age Group, 1975-2020.....	44
--	----

## TRENDS: Alcohol

13. People Killed, by Highest Driver BAC in the Crash, 1982-2020 .....	46
14. People Killed and Percentage Alcohol-Impaired Driving During Holiday Periods, 1982-2020 ...	48
15. Drivers in Fatal Crashes, by BACs and Time of Day, 1982-2020 .....	50
16. Drivers in Fatal Crashes, by BACs and Sex, 1982-2020.....	51
17. Drivers in Fatal Crashes, by BACs and Vehicle Type, 1982-2020 .....	52
18. Drivers in Fatal Crashes, by BACs and Age Group, 1982-2020.....	54
19. Drivers in Fatal Crashes, by BACs and Survival Status, 1982-2020 .....	58
20. Pedestrians Killed, 14 and Older, by BACs, 1982-2020 .....	59

## TRENDS: Restraints

21. Drivers of Passenger Cars and Light Trucks in Crashes, by Crash Severity and Restraint Use, 1975-2020.....	60
22. Occupants of Passenger Cars and Light Trucks Killed and Injured, by Restraint Use, 1975-2020.....	63

## TRENDS: Rollover

23. Passenger Car and Light-Truck Occupants Killed, by Vehicle Type and Rollover Occurrence, 1982-2020.....	65
---	----

**CRASHES: Time**

24. Crashes and Crash Rates, by Month and Crash Severity ..... 70  
 25. Crashes, by Time of Day, Day of Week, and Crash Severity ..... 71  
 26. Crashes, by Weather Condition, Light Condition, and Crash Severity..... 73  
 27. Fatal Crashes, by Emergency Medical Services Response Times Within Designated Minutes  
 and Land Use..... 74

**CRASHES: Location**

28. Crashes, by Crash Type, Relation to Roadway, and Crash Severity..... 75

**CRASHES: Circumstances**

29. Crashes, by First Harmful Event, Manner of Collision, and Crash Severity ..... 76  
 30. Two-Vehicle Crashes, by Vehicle Type and Crash Severity..... 77

**CRASHES: Alcohol**

31. Fatal Crashes and Percentage Alcohol-Impaired Driving, by Time of Day and Crash Type ..... 78

**VEHICLES: All Vehicles**

32. Vehicles Involved in Crashes, by Relation to Junction, Traffic Control Device,  
 and Crash Severity..... 84  
 33. Vehicles Involved in Crashes, by Speed Limit, Crash Type, and Crash Severity ..... 85  
 34. Vehicles Involved in Fatal Crashes, by Speed Limit and Land Use..... 86  
 35. Vehicles Involved in Crashes, by Number of Lanes, Trafficway Flow, and Crash Severity..... 87  
 36. Vehicles Involved in Crashes, by Vehicle Type and Crash Severity..... 88  
 37. Vehicles Involved in Fatal Crashes, by Body Type ..... 89  
 38. Vehicles Involved in Crashes, by Vehicle Type, Rollover Occurrence, and Crash Severity..... 90  
 39. Vehicles Involved in Crashes, by Vehicle Type, Fire Occurrence, and Crash Severity..... 92  
 40. Vehicles Involved in Single-Vehicle and Two-Vehicle Crashes, by Vehicle Maneuver  
 and Crash Severity..... 93  
 41. Vehicles Involved in Fatal Crashes, by Roadway Function Class, Crash Type,  
 and Hazardous Cargo ..... 94

**VEHICLES: Passenger Cars**

42. Passenger Cars Involved in Crashes, by Most Harmful Event and Crash Severity ..... 97  
 43. Passenger Cars Involved in Crashes, by Initial Point of Impact, Crash Severity,  
 and Crash Type..... 98

**VEHICLES: Light Trucks**

44. Light Trucks Involved in Crashes, by Most Harmful Event and Crash Severity ..... 99  
 45. Light Trucks Involved in Crashes, by Initial Point of Impact, Crash Severity,  
 and Crash Type..... 100

**VEHICLES: Large Trucks**

46. Large Trucks Involved in Crashes, by Most Harmful Event and Crash Severity ..... 101  
 47. Large Trucks Involved in Crashes, by Initial Point of Impact, Crash Severity,  
 and Crash Type..... 102  
 48. Large Trucks Involved in Crashes, by Truck Type, Rollover Occurrence,  
 and Crash Severity..... 103  
 49. Truck Tractors With Trailers Involved in Crashes, by Number of Trailers, Jackknife  
 Occurrence, and Crash Severity..... 104

## Tables (Continued)

---

### VEHICLES: Motorcycles

- 50. Motorcycles Involved in Crashes, by Most Harmful Event and Crash Severity..... 105
- 51. Motorcycles Involved in Crashes, by Initial Point of Impact, Crash Severity,  
and Crash Type..... 106

### VEHICLES: Buses

- 52. Buses Involved in Crashes, by Most Harmful Event and Crash Severity..... 107
- 53. Buses Involved in Crashes, by Initial Point of Impact, Crash Severity, and Crash Type..... 108

### PEOPLE: All Victims

- 54. People Killed and Injured, by Person Type and Injury Severity..... 112
- 55. People Killed and Injured, by Age Group and Injury Severity..... 112
- 56. People Killed and Injured, by Sex and Injury Severity..... 112
- 57. People Killed and Injured and Fatality and Injury Rates per 100,000 Population,  
by Age Group and Sex..... 114
- 58. People Killed and Injured in Crashes, by Weather Condition and Light Condition..... 116
- 59. People Killed in Crashes and Percentage Alcohol-Impaired-Driving Fatalities, by Time of Day  
and Crash Type..... 116
- 60. People Killed in Work Zones, by Roadway Function Class and Person Type..... 118
- 61. People Killed in Crashes Involving Emergency Vehicles, by Person Type, Crash Type,  
and Vehicle Type..... 118

### PEOPLE: Drivers

- 62. Driver Involvement Rates per 100,000 Licensed Drivers, by Age Group, Sex,  
and Crash Severity..... 121
- 63. Drivers Involved in Fatal Crashes, by Previous Driving Record and License Compliance..... 123
- 64. Related Factors for Drivers Involved in Fatal Crashes..... 123

### PEOPLE: Occupants

- 65. Vehicle Occupants Killed and Injured, by Vehicle Type, Person Type, and Injury Severity..... 124
- 66. Vehicle Occupants Killed and Injured in Crashes, by Speed Limit and Crash Type..... 125
- 67. Vehicle Occupants Killed in Crashes, by Speed Limit and Land Use..... 126
- 68. Vehicle Occupants Killed and Injured, by Sex and Vehicle Type..... 127
- 69. Vehicle Occupants Killed and Injured, by Age Group and Vehicle Type..... 128
- 70. Vehicle Occupants Killed and Injured, by Age Group, Person Type, and Sex..... 129
- 71. Vehicle Occupants Killed and Injured, by Vehicle Type and Most Harmful Event..... 130
- 72. Vehicle Occupants Killed and Injured, by Initial Point of Impact and Vehicle Type..... 131
- 73. Vehicle Occupants Killed and Injured, by Vehicle Type and Ejection..... 132
- 74. Occupants Killed and Injured in Two-Vehicle Crashes, by Vehicle Types Involved..... 133
- 75. Occupants Involved in Fatal Crashes and Occupant Fatalities, by Vehicle Body Type..... 134
- 76. Passenger Car and Light-Truck Occupants Involved in Fatal Crashes and Occupants Killed,  
by Vehicle Age and Vehicle Type..... 135

### PEOPLE: Alcohol

- 77. People Killed and Alcohol-Impaired-Driving Fatalities, by Person Type..... 136
- 78. Drivers Involved in Fatal Crashes, by Age Group and BACs..... 136
- 79. Drivers Killed in Crashes, by Time of Day, Day of Week, Age Group, Alcohol Impairment,  
and Crash Type..... 138
- 80. Drivers Killed in Crashes, by Age Group and BACs..... 138
- 81. Drivers Involved in Fatal Crashes, by Vehicle Type and BACs..... 140
- 82. People Killed, by Age Group and Highest Driver BAC in the Crash..... 140
- 83. Pedestrians Killed, by Pedestrian and Driver BAC..... 140

**PEOPLE: Restraints**

84. Drivers Involved in Crashes, by Vehicle Type, Restraint Use, and Crash Severity..... 141

85. Passenger Car and Light-Truck Occupants Killed and Injured, by Age Group and Restraint Use ..... 142

86. Passenger Car and Light-Truck Occupant Survivors of Fatal Crashes, by Age Group and Restraint Use ..... 143

87. Passenger Car Occupants Killed and Injured, by Seating Position and Restraint Use ..... 144

88. Light-Truck Occupants Killed and Injured, by Seating Position and Restraint Use ..... 145

89. Passenger Car and Light-Truck Occupants Killed and Injured, by Restraint Use and Type of Restraint ..... 146

**PEOPLE: Rollover**

90. Passenger Car and Light-Truck Occupants Killed, by Crash Type, Vehicle Type, and Rollover Occurrence..... 147

**PEOPLE: Motorcyclists**

91. Motorcyclists Killed and Injured, by Time of Day and Day of Week..... 148

92. Motorcyclists Killed, by Person Type and Helmet Use ..... 150

93. Motorcycle Riders Involved in Fatal Crashes, by Age Group and License Compliance..... 150

**PEOPLE: School-Bus-Related**

94. Pedestrians Killed in School-Bus-Related Crashes, by Age Group and Striking Vehicle ..... 151

95. People Killed and Injured in School-Bus-Related Crashes, by Person Type ..... 151

**PEOPLE: Pedestrians**

96. Pedestrians Killed and Injured, by Age Group and Location ..... 152

97. Pedestrians Killed and Injured and Fatality and Injury Rates per 100,000 Population, by Age Group and Sex ..... 153

98. Pedestrians Killed and Injured, by Time of Day and Day of Week..... 154

99. Pedestrians Killed and Injured in Single-Vehicle Crashes, by Vehicle Type and Initial Point of Impact ..... 156

100. Pedestrians Killed, by Related Factors..... 156

**PEOPLE: Pedalcyclists**

101. Pedalcyclists Killed and Injured, by Age Group and Location ..... 157

102. Pedalcyclists Killed and Injured and Fatality and Injury Rates per 100,000 Population, by Age Group and Sex ..... 158

103. Pedalcyclists Killed and Injured, by Time of Day and Day of Week ..... 159

104. Pedalcyclists Killed and Injured in Single-Vehicle Crashes, by Vehicle Type and Initial Point of Impact ..... 160

105. Pedalcyclists Killed, by Related Factors ..... 161

**STATES: Crashes and All Victims**

106. 2020 Traffic Fatalities, by State and Percentage Change From 2019..... 166

107. Fatal Crashes, by State and First Harmful Event..... 168

108. Fatal Crashes, by State and Roadway Function Class ..... 170

109. People Killed, by State and Roadway Function Class ..... 172

110. People Killed, Population, Licensed Drivers, Registered Vehicles, VMT, and Fatality Rates, by State..... 174

111. People Killed, by State and Person Type ..... 176

112. People Killed, by State and Age Group ..... 178

## Tables (Continued)

---

### **STATES: Occupants**

- 113. Occupants Killed, by State and Vehicle Type ..... 180
- 114. Passenger Car and Light-Truck Occupants Killed, by State and Restraint Use ..... 182

- 115. Passenger Car and Light-Truck Occupants Killed, by State, Vehicle Type, and Rollover Occurrence..... 184

### **STATES: Pedestrians**

- 116. 2020 Ranking of State Pedestrian Fatality Rates ..... 186

### **STATES: Alcohol**

- 117. People Killed, by State and Highest Driver BAC in the Crash..... 188
- 118. Drivers Involved in Fatal Crashes, by State and BACs ..... 190
- 119. Drivers Killed in Crashes, by State and BACs ..... 192
- 120. Surviving Drivers Involved in Fatal Crashes, by State and BACs ..... 194

### **STATES: Speeding**

- 121. Speeding-Related Traffic Fatalities, by State and Roadway Function Class..... 196

### **STATES: Emergency Medical Services**

- 122. Rural Fatal Crashes, by State and Average Emergency Medical Services Response Times .. 198
- 123. Urban Fatal Crashes, by State and Average Emergency Medical Services Response Times . 200

### **STATES: City Rates**

- 124. People Killed, Population, and Fatality Rates in Cities With Populations of 150,000 or Greater..... 202

### **STATES: Fatalities and Fatality Rates**

- 125. Fatalities and Fatality Rates, by State, 1975-2020 ..... 207

## TRENDS

1. Crashes, by Crash Severity, 1975-2020 .....	18
2. Motor Vehicle Fatality and Injury Rates per 100 Million VMT, 1966-2020 .....	22
3. Driver Involvement Rates per 100,000 Licensed Drivers 16 and Older, by Sex and Crash Severity, 1975-2020 .....	31
4. Passenger Car Occupant Fatality and Injury Rates per 100 Million VMT, 1975-2020 .....	35
5. Light-Truck Occupant Fatality and Injury Rates per 100 Million VMT, 1975-2020 .....	37
6. Large-Truck Occupant Fatality and Injury Rates per 100 Million VMT, 1975-2020 .....	39
7. Motorcyclist Fatality and Injury Rates per 100 Million VMT, 1975-2020 .....	41
8. Proportion of People Killed, by Highest Driver BAC in the Crash, 1982-2020 .....	47
9. Proportion of Drivers in Fatal Crashes With BACs = .08+ g/dL, by Vehicle Type, 1982-2020 ...	53
10. Proportion of Drivers in Fatal Crashes With BACs = .08+ g/dL, by Age Group, 1982-2020 .....	57

## CRASHES

11. Average Fatal Crashes per Hour, by Time of Day, Weekdays, and Weekends .....	72
12. Percentage of Fatal Crashes Involving Alcohol-Impaired Driving, by Time of Day and Crash Type .....	79

## VEHICLES

13. Proportion of Vehicles Involved in Traffic Crashes .....	88
14. Percentage Rollover Occurrence, by Vehicle Type and Crash Severity .....	91
15. Percentage of Vehicles in Crashes, by Most Harmful Event and Vehicle Type .....	95
16. Percentage of Vehicles in Crashes, by Initial Point of Impact, Crash Type, and Vehicle Type ..	96

## PEOPLE

17. Percentage of People Killed and Injured, by Age Group .....	113
18. Fatality and Injury Rates per 100,000 Population, by Age Group and Sex .....	115
19. Percentage of People Killed in Alcohol-Impaired-Driving Crashes, by Time of Day and Crash Type .....	117
20. Fatality and Injury Rates per 1,000 Crashes, by First Harmful Event and Manner of Collision .....	119
21. Fatality and Injury Rates per 1,000 Crashes, by Time of Day .....	120
22. Driver Involvement Rates per 100,000 Licensed Drivers, by Age Group, Sex, and Crash Severity .....	122
23. Percentage of Vehicle Occupants Killed, by Speed Limit and Land Use .....	126
24. Percentage Alcohol Impairment (BAC = .08+ g/dL) for Drivers Involved in Fatal Crashes, by Age Group .....	137
25. Percentage of Drivers Killed Who Were Alcohol-Impaired (BAC = .08+ g/dL), by Age Group, Crash Type, Time of Day, and Day of Week .....	139
26. Average Number of Motorcyclists Killed per Hour, by Time of Day and Day of Week .....	149
27. Average Number of Pedestrians Killed per Hour, by Time of Day and Day of Week .....	155

## STATES

28. 2020 Traffic Fatalities, by State and Percentage Change From 2019 .....	167
---	-----

# GLOSSARY

---

## Alcohol Involvement

NHTSA defines a fatal crash as alcohol-related or alcohol-involved if at least one driver or nonoccupant (such as a pedestrian or pedalcyclist) involved in the crash is determined to have had a blood alcohol concentration (BAC) of .01 grams per deciliter (g/dL) or higher. Thus, any fatality that occurs in an alcohol-related crash is considered an alcohol-related fatality.

NHTSA defines a nonfatal crash as alcohol-related or alcohol-involved if police indicate on the police crash report that there is evidence of alcohol present. The code does not necessarily mean that a driver or nonoccupant was tested for alcohol.

The terms “alcohol-related” and “alcohol-involved” do not indicate that a crash or fatality was caused by the presence of alcohol.

## Alcohol-Impaired-Driving Crashes

Crashes that involve at least one driver or motorcycle rider (operator) with a BAC of .08 g/dL or higher. Thus, any crash involving a driver or motorcycle rider with a BAC of .08 g/dL or higher is considered to be an alcohol-impaired-driving crash.

## Alcohol-Impaired-Driving Fatalities

Fatalities in crashes that involve at least one driver or motorcycle rider (operator) with a BAC of .08 g/dL or higher. Thus, any fatality occurring in a crash involving a driver or motorcycle rider with a BAC of .08 g/dL or higher is considered to be an alcohol-impaired-driving fatality.

## Blood Alcohol Concentration

BAC is measured as the weight of alcohol in a volume of blood (g/dL). A positive BAC level (.01 g/dL or higher) indicates that alcohol was consumed by the person tested; a BAC level of .08 g/dL or more indicates that the person was alcohol-impaired.

## Body Type

Detailed type of motor vehicle within a vehicle type.

## Bus

Any motor vehicle designed primarily to transport large groups of nine or more people, including the driver. Includes school buses, inter-city buses, and transit buses.

## Combination Truck

A truck tractor not pulling a trailer; a tractor pulling at least one full- or semi-trailer; or a single-unit truck pulling at least one trailer.

## Crash

An event that produces injury and/or property damage, involves a motor vehicle in transport, and occurs on a trafficway or while the vehicle is still in motion after running off the trafficway.

## Crash Severity

1. **Fatal Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which at least one person dies within 30 days of the crash.
2. **Injury Crash.** A police-reported crash that involves a motor vehicle in transport on a trafficway in which no one died but at least one person was reported to have: (1) an incapacitating injury; (2) a visible but not incapacitating injury; (3) a possible, not visible injury; or (4) an injury of unknown severity.
3. **Property-Damage-Only Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which no one involved in the crash suffered any injuries.

## Crash Type

Single-vehicle or multiple-vehicle crash.

## Day

From 6 a.m. to 5:59 p.m.

**Driver**

An occupant of a vehicle who is in physical control of a motor vehicle in transport, or for an out-of-control vehicle, an occupant who was in control until control was lost.

**Ejection**

Refers to an occupant being totally or partially thrown from the vehicle as a result of an impact or rollover.

**First Harmful Event**

The first event during a crash that caused injury or property damage.

**Fixed Object**

Stationary structures or substantial vegetation attached to the terrain.

**Gross Vehicle Weight Rating**

The GVWR is the maximum rated capacity of a vehicle, including the weight of the base vehicle, all added equipment, driver and passengers, and all cargo loaded into or on the vehicle. Actual weight may be less than or greater than GVWR.

**Impact Point**

The first impact point that produced personal injury or property damage, regardless of First or Most Harmful Event.

**Injury Severity**

The police-reported injury severity of the person (occupant, pedestrian, or pedalcyclist).

1. Killed (Fatal)
2. Injured (Incapacitating injury, evident injury but not incapacitating, complaint of injury, or injured, severity unknown)
3. No injury

**Jackknife**

Jackknife can occur at any time during the crash sequence. In this report, jackknifing is restricted to a truck tractor pulling a trailing unit in which the trailing unit and the pulling vehicle rotate with respect to each other.

**Junction**

Area formed by the connection of two roadways, including intersections, interchange areas, and entrance/exit ramps.

**Land Use**

The crash location (urban or rural).

**Large Trucks**

Trucks over 10,000 pounds GVWR, including single-unit trucks and truck tractors.

**Light Trucks**

Trucks of 10,000 pounds GVWR or less, including pickups, vans, truck-based station wagons, and utility vehicles (SUVs).

**Manner of Collision**

A classification for crashes in which the First Harmful Event was a collision between two motor vehicles in transport and is described as one of the following:

**Angle.** Collisions that are not head-on, rear-end, rear-to-rear, or sideswipe.

**Head-on.** A collision where the front of one vehicle collides with the front of another vehicle while the two are traveling in opposite directions.

**Rear-end.** A collision in which one vehicle collides with the rear of another vehicle.

**Sideswipe.** A collision in which the sides of both vehicles sustain minimal engagements.

**Most Harmful Event**

The event during a crash for a particular vehicle that is judged to have produced the greatest personal injury or property damage.

**Motor Vehicle in Transport**

A motor vehicle in motion on the trafficway or any other motor vehicle on the roadway, including stalled, disabled, or abandoned vehicles.

**Motorcycle**

A 2- or 3-wheeled motor vehicle designed to transport one or two people, including motor-scooters, minibikes, and mopeds.

**Motorcycle Rider**

The operator (driver) of a motorcycle.

**Motorcyclist**

Any person riding on a motorcycle, including the motorcycle rider (operator) and any passenger (a person riding on, but not in control of, the motorcycle).

**Night**

From 6 p.m. to 5:59 a.m.

**Noncollision**

A class of crash in which the First Harmful Event does not involve a collision with a fixed object, nonfixed object, or a motor vehicle. This includes overturn, fire/explosion, fall from a vehicle, and injuries in a vehicle.

**Nonoccupant**

Any person who is not an occupant of a motor vehicle in transport and includes the following.

1. Pedestrians
2. Pedalcyclists
3. Occupants of parked motor vehicles
4. Others such as joggers, skateboard riders, people riding on animals, and people riding in animal-drawn conveyances

**Nonoccupant Location**

The location of nonoccupants at time of impact. Intersection locations are coded only if nonoccupants were struck in the area formed by a junction of two or more trafficways. Non-intersection location may include nonoccupants struck on a junction of a driveway/alley access and a named trafficway. Nonoccupants who are occupants of motor vehicles not in transport are coded with respect to the location of the vehicle.

**Objects Not Fixed**

Objects that are movable or moving but are not motor vehicles. Includes pedestrians, pedalcyclists, animals, or trains (e.g., spilled cargo in roadway).

**Occupant**

Any person who is in or on a motor vehicle in transport. Includes the driver, passengers, and any person riding on the exterior of a motor vehicle.

**Other Vehicle**

Consists of the following types of vehicles.

1. Large limousine (more than four side doors or stretched chassis)
2. 3-wheel automobile or automobile derivative
3. Van-based motorhome
4. Light-truck-based motorhome (chassis mounted)
5. Large-truck-based motorhome
6. ATV (all-terrain vehicle, including dune/swamp buggy) and ATC (all-terrain cycle)
7. Snowmobile
8. Farm equipment other than trucks
9. Construction equipment other than trucks (includes graders)
10. Other type vehicle (includes go-cart, fork-lift, city streetsweeper).

**Passenger**

Any occupant of a motor vehicle who is not a driver.

**Passenger Car**

Motor vehicles used primarily for carrying passengers, including convertibles, sedans, and station wagons.

**Pedalcyclist**

A person on a vehicle powered solely by pedals.

**Pedestrian**

Any person not in or upon a motor vehicle or other vehicle.

**Restraint Use**

The occupant's use of available vehicle restraints, including lap belt, shoulder belt, or automatic belt.

**Roadway**

That part of a trafficway designed, improved, and ordinarily used for motor vehicle travel.

**Roadway Function Class**

The classification describing the character of service the street or highway. Includes the following:

**Interstates.** Limited access divided facilities of at least four lanes designated by the FHWA as part of the Interstate System.

**Other Freeways and Expressways.** All urban principal arterial with limited control of access not on the Interstate System.

**Other Principal Arterials.** Major streets or highways, many with multi-lane or freeway design, serving high-volume traffic corridor movements that connect major generators of travel.

**Minor Arterials.** Streets and highways linking cities and larger towns in rural areas in distributing trips to small geographic areas in urban areas (not penetrating identifiable neighborhoods).

**Collectors.** In rural areas, routes serving intra-county, rather than statewide travel. In urban areas streets providing direct access to neighborhoods as well as direct access to arterials.

**Local Streets and Roads.** Streets whose primary purpose is feeding higher order systems, providing direct access with little or no through traffic.

**Rollover**

Any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Includes rollovers occurring as a First Harmful Event or subsequent event.

**Seating Position**

The location of the occupants in the vehicle. More than one can be assigned the same seat position; however, this is allowed only when a person is sitting on someone's lap.

**School-Bus-Related Crash**

Any crash in which a vehicle, regardless of body design, used as a school bus is directly or indirectly involved, such as a crash involving school children alighting from a vehicle.

**Single-Unit Truck**

A medium or heavy truck in which the engine, cab, drive train, and cargo area are all on one chassis.

**Trafficway**

Any road, street, or highway open to the public as a matter of right or custom for moving people or property from one place to another.

**Vehicle**

See *Motor Vehicle in Transport*.

**Vehicle Type**

A series of motor vehicle body types that have been grouped together because of their design similarities. The principal vehicle types used in this report are passenger car, light truck, large truck, motorcycle, bus, and other vehicle. See the definition of each of the vehicle types elsewhere in this glossary.

**Weekday**

From 6 a.m. Monday to 5:59 p.m. Friday.

**Weekend**

From 6 p.m. Friday to 5:59 a.m. Monday.

# INTRODUCTION

---

In this annual report, *Traffic Safety Facts 2020: A Compilation of Motor Vehicle Crash Data*, the National Highway Traffic Safety Administration presents descriptive statistics about traffic crashes of all severities, from those that result in property damage to those that result in the loss of human life.

Information from three of NHTSA's primary data systems has been combined to create a single source for motor vehicle traffic crash statistics. The first data system, the Fatality Analysis Reporting System (FARS), is probably the better known of the three sources. Established in 1975, FARS contains data on the most severe traffic crashes, those in which someone was killed. The second source is the National Automotive Sampling System General Estimates System (NASS GES), which began operation in 1988 and ended in 2015. NASS GES contains data from a nationally representative sample of police-reported crashes of all severities, including those that resulted in death, injury, or property damage. The third source is the Crash Report Sampling System (CRSS), which replaced NASS GES in 2016. CRSS is the redesigned nationally representative sample of police-reported traffic crashes.

FARS, GES, and CRSS were designed and developed by NHTSA's National Center for Statistics and Analysis (NCSA) to provide an overall measure of highway safety, to help identify traffic safety problems, to suggest solutions, and to help provide an objective basis on which to evaluate the effectiveness of motor vehicle safety standards and highway safety initiatives. Data from these systems is used to answer requests for information from the international and national highway traffic safety communities, including State and local governments, the Congress, Federal agencies, research organizations, industry, the media, and the general public.

# FARS OPERATIONS

---

The Fatality Analysis Reporting System (FARS) became operational in 1975 and contains data on a census of fatal traffic crashes in the 50 States, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public, and must result in the death of an occupant of a vehicle or a nonoccupant within 30 days of the crash.

NHTSA has a cooperative agreement with an agency in each State's government to provide information on all qualifying fatal crashes in the State. These agreements are managed by the NCSA State Data System, Office of Data Acquisition. Trained State employees, called "FARS analysts," are responsible for gathering, translating, and transmitting their State's data to NCSA's standard format. The number of analysts varies by State, depending on the number of fatal crashes and the ease of obtaining data.

FARS data are obtained solely from the States' existing documents.

Police Crash Reports (PCRs)	Death Certificates
State Vehicle Registration Files	Coroner/Medical Examiner Reports
State Driver Licensing Files	Emergency Medical Service Reports
State Highway Department Data	Other State Records
Vital Statistics	

From these documents FARS analysts code more than 140 FARS data elements. The specific data elements may be modified slightly each year to conform to changing user needs, vehicle characteristics, and highway safety emphasis areas. The data collected in FARS does not include any personal identifying information such as names, addresses, or social security numbers. Thus, any data kept in FARS files and made available to the public fully conforms to the Privacy Act.

Each FARS analyst enters data into a local microcomputer data file, and daily updates are sent to NHTSA's central computer database. Data are automatically checked when entered for acceptable range values and for consistency, enabling the analyst to make corrections immediately. Several programs continually monitor and improve the completeness and accuracy of the data. The 2020 FARS data file used for the statistics in this report was created in September 2021; however, the 2020 FARS file will officially close in January 2022. This additional time provides the opportunity for submission of important variable data requiring outside sources, which may lead to changes in the final counts. The updated final counts for 2019 are reflected in this report. The updated final counts for 2020 will be reflected in the 2021 annual report.

# GES OPERATIONS

---

Data from the National Automotive Sampling System (NASS) General Estimates System (GES) was obtained from a nationally representative probability sample selected from all police-reported crashes. The NASS GES system began operation in 1988 and ended in 2015. To be eligible for the GES sample, a PCR must be completed for the crash, and the crash must involve at least one motor vehicle traveling on a trafficway and must result in property damage, injury, or death. Although various sources suggest that about half the motor vehicle crashes in the country are not reported to police, the majority of these unreported crashes involve only minor property damage and no significant personal injury. By restricting attention to police-reported crashes, the GES concentrated on those crashes of greatest concern to the highway safety community and the general public.

GES data collectors made weekly visits to 410 police jurisdictions in 60 sites across the United States, where they randomly sampled about 55,000 PCRs per year. The collectors obtained copies of the PCRs and sent them to the NASS quality control centers for coding. No other data was collected beyond the selected PCRs—no driver license, vehicle registration, or medical information was obtained.

Trained data entry personnel interpreted and coded data directly from the PCRs into an electronic data file. Approximately 90 data elements were coded into a common format. Some elements were modified every other year to meet the changing needs of the highway safety community. To protect individual privacy, no personal information (names, addresses, specific crash locations) was coded. During data coding, the data was checked electronically for validity and consistency. After the data file was created, further quality checks were performed on the data through computer processing and by the data coding supervisors.

# CRSS OPERATIONS

---

NHTSA developed and implemented the NASS in the 1970s to make estimates of the motor vehicle crash experience in the United States. In 1988 NHTSA split the NASS into two surveys, the GES and the Crashworthiness Data System (CDS). Since then, the same data collection sites have been used for GES data collection. Given the shifts in population and the vehicle fleet, and the changing analytic needs of the safety community, Congress authorized NHTSA to modernize its crash data collection system. NHTSA redesigned the nationally representative sample of police-reported traffic crashes in the United States. The new system, called the Crash Report Sampling System (CRSS), replaced NASS GES in 2016.

CRSS was designed independent of other NHTSA surveys. The target population for the CRSS is the same as that for the NASS GES: all police-reported motor vehicle crashes on trafficways. The CRSS obtains its data from a nationally representative probability sample selected from the more than 7 million police-reported crashes that occur annually. To be eligible for the CRSS sample, a crash report must be completed by the police; it must involve at least one motor vehicle traveling on a trafficway; and the crash must result in property damage, injury, or death.

These crash reports are chosen from 60 selected sites across the United States that reflect the geography, population, miles driven, and crashes in the United States. CRSS data collectors review crash reports from hundreds of law enforcement agencies within the sites, systematically sampling tens of thousands of PCRs each year. The collectors obtain copies of the selected PCRs and send them to a central location for coding. No other data are collected beyond that in the selected crash reports.

Trained personnel interpret and code data directly from the PCRs into an electronic data file. Approximately 120 data elements are coded into a common format. After coding, quality checks are performed on the data to ensure validity and consistency. When these are completed, CRSS data files and coding documentation become publicly available.

# ABOUT THIS REPORT

Fatal crash data from FARS and nonfatal crash data from GES and CRSS are presented in this report in five chapters. Chapter 1, “Trends,” presents data from all years of FARS (1975 to 2020), GES (1988 to 2015), and CRSS (2016 to 2020). The remaining chapters present data only from 2020. Chapter 2, “Crashes,” describes general characteristics of crashes, such as when and how often they occurred, where they occurred, and what happened during the crashes. Chapter 3, “Vehicles,” concentrates on the types of vehicles involved in crashes and the damage to the vehicles. Chapter 4, “People,” is the largest chapter of this report, with statistics about drivers, passengers, pedestrians, and pedalcyclists. The last chapter, “States,” contains information about crashes for each State, the District of Columbia, and Puerto Rico. Terms used throughout the report are defined in the Glossary.

Statistics describing fatal crashes or fatalities have been derived from FARS. Statistics describing injury or property-damage-only crashes have been derived from GES (or CRSS) and statistics describing nonfatal injuries have been derived from both FARS and GES (or CRSS). The reader should be aware that FARS numbers are actual counts of fatalities or fatal crashes, whereas GES and CRSS numbers are estimates of counts of crashes and people injured and are subject to sampling and non-sampling errors. (See Appendix C for more information on these errors.) To emphasize this difference, FARS numbers are not rounded, while GES and CRSS estimates have been rounded to the nearest thousand. As a result of the rounding, for some tables, the sum of the row or column entries may not equal the row or column total. In addition, percentages have been calculated prior to rounding.

The reader may also notice that many tables have rows or footnotes for “unknowns” for FARS data, but not for GES or CRSS data. The reason for this difference is that almost all the GES or CRSS unknown data have been assigned values through complex statistical procedures. FARS unknown data, on the other hand, are not assigned values, with the exception of BAC test results. When the alcohol test results are unknown, BAC values in g/dL have been assigned to drivers and nonoccupants involved in fatal crashes, using a method of multiple imputation revised in 2001. More information on the multiple imputation method, including detailed tabulations of alcohol involvement in various categories (age, sex, time of day, etc.), is available in a NHTSA Technical Report, *Transitioning to Multiple Imputation: A New Method to Estimate Missing Blood Alcohol Concentration (BAC) Values in FARS*.<sup>1</sup>

## Changes from the *Traffic Safety Facts 2019* Report

### *People Injured and Crash Estimates*

A change instituted with the release of 2020 data is rounding people injured, injury crash, and property-damage-only crash estimates to the nearest whole number. Prior year reports presented these estimates rounded to the nearest thousand.

<sup>1</sup> Subramanian, R. (2002, October). *Transitioning to multiple imputation – A new method to estimate missing blood alcohol concentration (BAC) values in FARS* (Report No. DOT HS 809 403). National Highway Traffic Safety Administration. <https://crashstats.nhtsa.dot.gov/Api/Public/ViewPublication/809403>

## About This Report

---

### *Crash Report Sampling System (CRSS) Replaces the National Automotive Sampling System (NASS) General Estimates System (GES)*

NHTSA's National Center for Statistics and Analysis redesigned the nationally representative sample of police-reported traffic crashes, which estimates the number of police-reported injury and property-damage-only crashes in the United States. The new system, CRSS, replaced NASS GES in 2016. However, the 2016 and later year estimates are not comparable to 2015 and earlier year estimates because of different sampling designs. For more information on CRSS, refer to *Crash Report Sampling System: Sample Design and Weighting* or *Crash Report Sampling System: Design Overview, Analytic Guidance, and FAQs*.<sup>2,3</sup>

### *Methodology Change for Estimating People Injured*

In calendar year 2020, NCSA changed the methodology of estimating people nonfatally injured in motor vehicle traffic crashes. The new approach combines people nonfatally injured from both FARS and NASS GES/CRSS. This is done by combining people nonfatally injured in fatal crashes from FARS with people nonfatally injured in nonfatal injury crashes from NASS GES/CRSS. The old approach was to extract people injured from only NASS GES/CRSS by selecting people nonfatally injured in all crashes, regardless of crash severity. This change in methodology caused some estimates of people injured to change for some prior years.

### *FARS Final File Revisions*

Minor revisions were made to cases in the 2017 and 2018 Final files. However, these revisions did not change the overall fatal crash and fatality counts reported from the previous 2017 and 2018 Final file.

### *Update to Table 76*

The previous Table 76 titled "Passenger Car Occupants Involved in Fatal Crashes and Occupants Killed, by Car Wheelbase Size" has been replaced with "Passenger Car and Light-Truck Occupants Involved in Fatal Crashes and Occupants Killed, by Vehicle Age and Vehicle Type."

### *Registered Vehicles and VMT by Vehicle Type*

Vehicle registration data for passenger vehicles (cars and light trucks) was obtained from R. L. Polk's National Vehicle Population Profile (NVPP), which is a compilation of all passenger vehicles that have been registered in compliance with State requirements. (R.L. Polk is a foundation of IHS Markit automotive solutions.) Subsequently, overall registrations and passenger car and light-truck VMT were revised by NHTSA, using a combination of Polk and FHWA exposure data.

<sup>3</sup> Zhang, F., Subramanian, R., Chen, C.-L., & Noh, E. Y. (2019, April). *Crash Report Sampling System: Design overview, analytic guidance, and FAQs* (Report No. DOT HS 812 688). National Highway Traffic Safety Administration. <https://crashstats.nhtsa.dot.gov/Api/Public/ViewPublication/812688>

Polk enhanced the data quality of its NVPP, resulting in a complete rewrite of the data as a result of (1) enhanced business rules for vehicles on the road, (2) more consistent reporting/processing across States, and (3) upgraded basis for vehicle coding. A comparison of Polk's "old" NVPP and "new" NVPP for 2011 shows that the enhancements resulted in an increase of more than 3 percent in NHTSA's passenger vehicle registration counts, consisting of a 5.6 percent decrease in the 2011 passenger car count and a 14.6 percent increase in the 2011 light-truck count from the old NVPP to the new NVPP, as shown in the table below. Consequently, the data in this report for vehicle registrations and VMT from 2011 to 2020 is not strictly comparable with the data for all prior years, which was based on Polk's old NVPP.

### Registered Vehicles: NCSA Revised Using Polk and FHWA Data

Year	Passenger Cars (Polk)	Light Trucks (Polk)	Motorcycles (FHWA)	Buses (FHWA)	Large Trucks (FHWA)	NCSA Revised Total
2009 (Old NVPP)	137,203,972	102,008,600	7,929,724	841,993	10,973,214	258,957,503
2010 (Old NVPP)	135,310,480	102,376,147	8,009,503	846,051	10,770,054	257,312,235
2011 (Old NVPP)	134,543,655	103,594,529	8,437,502	666,064	10,270,693	257,512,443
2011 (New NVPP)	126,966,714	118,702,389	8,437,502	666,064	10,270,693	265,043,362
2012 (New NVPP)	127,077,676	118,690,690	8,454,939	764,509	10,659,380	265,647,194
2013 (New NVPP)	128,936,225	120,491,485	8,404,687	864,549	10,597,356	269,294,302
2014 (New NVPP)	131,138,925	123,470,278	8,417,718	872,027	10,905,956	274,804,904
2015 (New NVPP)	133,218,366	127,401,053	8,600,936	888,907	11,203,184	281,312,446
2016 (New NVPP)	134,827,696	132,052,102	8,679,380	976,161	11,498,561	288,033,900
2017 (New NVPP)	132,864,363	135,594,973	8,664,108	983,231	12,229,216	290,335,891
2018 (New NVPP)	132,837,515	141,312,896	8,659,741	992,152	13,233,910	297,036,214
2019 (New NVPP)	129,838,156	146,751,968	8,596,314	995,033	13,085,643	299,267,114
2020 (New NVPP)	124,893,768	149,947,352	8,317,363	1,006,469	13,479,382	297,644,334

### VMT: Polk and FHWA

Year	Passenger Cars (Revised FHWA Using Polk)	Light Trucks (Revised FHWA Using Polk)	Motorcycles (FHWA)	Buses (FHWA)	Large Trucks (FHWA)	Total (FHWA)
2009 (Old NVPP)	1,510,339	1,122,909	20,822	14,387	288,306	2,956,764
2010 (Old NVPP)	1,507,716	1,140,740	18,513	13,770	286,527	2,967,266
2011 (Old NVPP)	1,497,460	1,152,998	18,542	13,807	267,594	2,950,402
2011 (New NVPP)	1,369,810	1,280,648	18,542	13,807	267,594	2,945,194
2012 (New NVPP)	1,377,486	1,286,574	21,385	14,781	269,207	2,963,497
2013 (New NVPP)	1,384,194	1,293,536	20,366	15,167	275,017	2,982,941
2014 (New NVPP)	1,396,098	1,314,458	19,970	15,999	279,132	3,020,377
2015 (New NVPP)	1,420,869	1,358,824	19,606	16,230	279,844	3,089,841
2016 (New NVPP)	1,439,678	1,410,040	20,445	16,350	287,895	3,173,815
2017 (New NVPP)	1,424,056	1,453,322	20,149	17,227	297,593	3,210,248
2018 (New NVPP)	1,403,760	1,493,323	20,076	18,303	304,864	3,240,327
2019 (New NVPP)	1,372,622	1,551,431	19,688	17,980	300,050	3,261,772
2020 (New NVPP)	1,167,293	1,401,452	17,632	15,104	302,141	2,903,622

Note: NCSA revises FHWA's Passenger Car and Light-Truck VMT using Polk's registration counts.

# DATA AVAILABILITY

While this report presents a wide spectrum of information in more than 100 tables and figures, it contains only a fraction of the data available from FARS, NASS GES, and CRSS. Additional data from FARS (1975 to 2020), NASS GES (1988 to 2015), and CRSS (2016 to 2020) are available in several ways, including the following.

- Traffic Safety Facts Annual Report Tables can be obtained from the online portal at <https://cdan.dot.gov/tsftables/tsfar.htm>, which contains the most current data available, unlike the Traffic Safety Facts Annual Report publication. The 2019 and earlier year FARS data are final. Although the 2020 data file is a full year's worth of data, it is subject to change when it is finalized. Tables in this report can be rendered using the latest FARS and NASS GES (or CRSS) data available.
- FARS data can also be accessed at [www-fars.nhtsa.dot.gov/Main/index.aspx](http://www-fars.nhtsa.dot.gov/Main/index.aspx). This website provides instant access to the 1994 to 2020 FARS data via reports, which is an inventory of the fatality statistical reports found in this publication. These are national reports for current and past years that may be customized by selection of State, and for State reports, county tabulation may be selected.
- Data visualization tools for Traffic Safety fact sheets can be found at <https://cdan.dot.gov/Data-Visualization/DataVisualization.htm>.
- FARS and GES/CRSS data can be queried using the Fatality and Injury Reporting System Tool (FIRST) at <https://cdan.dot.gov/query>.
- FARS, NASS GES, and CRSS data can be obtained by downloading published files from [www.nhtsa.gov/node/97996/251](http://www.nhtsa.gov/node/97996/251) (FARS), [www.nhtsa.gov/node/97996/256](http://www.nhtsa.gov/node/97996/256) (NASS GES), or [www.nhtsa.gov/node/97996/221](http://www.nhtsa.gov/node/97996/221) (CRSS). The files are available in Statistical Analysis System (SAS) or Comma Separated Values (CSV) file formats. This will enable you to process the data using your own computer system.
- Modest requests for specific data will be answered by NCSA at no charge. Response usually requires about two weeks, depending on the nature and complexity of the data requested.

Requests for more information from FARS, NASS GES, or CRSS should be directed to:

National Highway Traffic Safety Administration  
National Center for Statistics and Analysis, NSA-230  
1200 New Jersey Avenue SE  
Washington, DC 20590  
800-934-8517  
Email: [NCSARequests@dot.gov](mailto:NCSARequests@dot.gov)

Additional information on all NHTSA's data files, including FARS, NASS GES, and CRSS can be found on the NCSA website at [www.nhtsa.gov/data](http://www.nhtsa.gov/data). Fact sheets, recent NCSA research notes, and abstracts of technical reports can be downloaded in PDF format. Comments and suggestions about the NCSA website can be emailed to [NCSARequests@dot.gov](mailto:NCSARequests@dot.gov).

## VEHICLE SAFETY HOTLINE

To report a motor vehicle safety-related problem or to inquire about safety information, contact the Vehicle Safety Hotline at 888-327-4236 or [www.nhtsa.gov/report-a-safety-problem](http://www.nhtsa.gov/report-a-safety-problem).

Chapter 1

# TRENDS

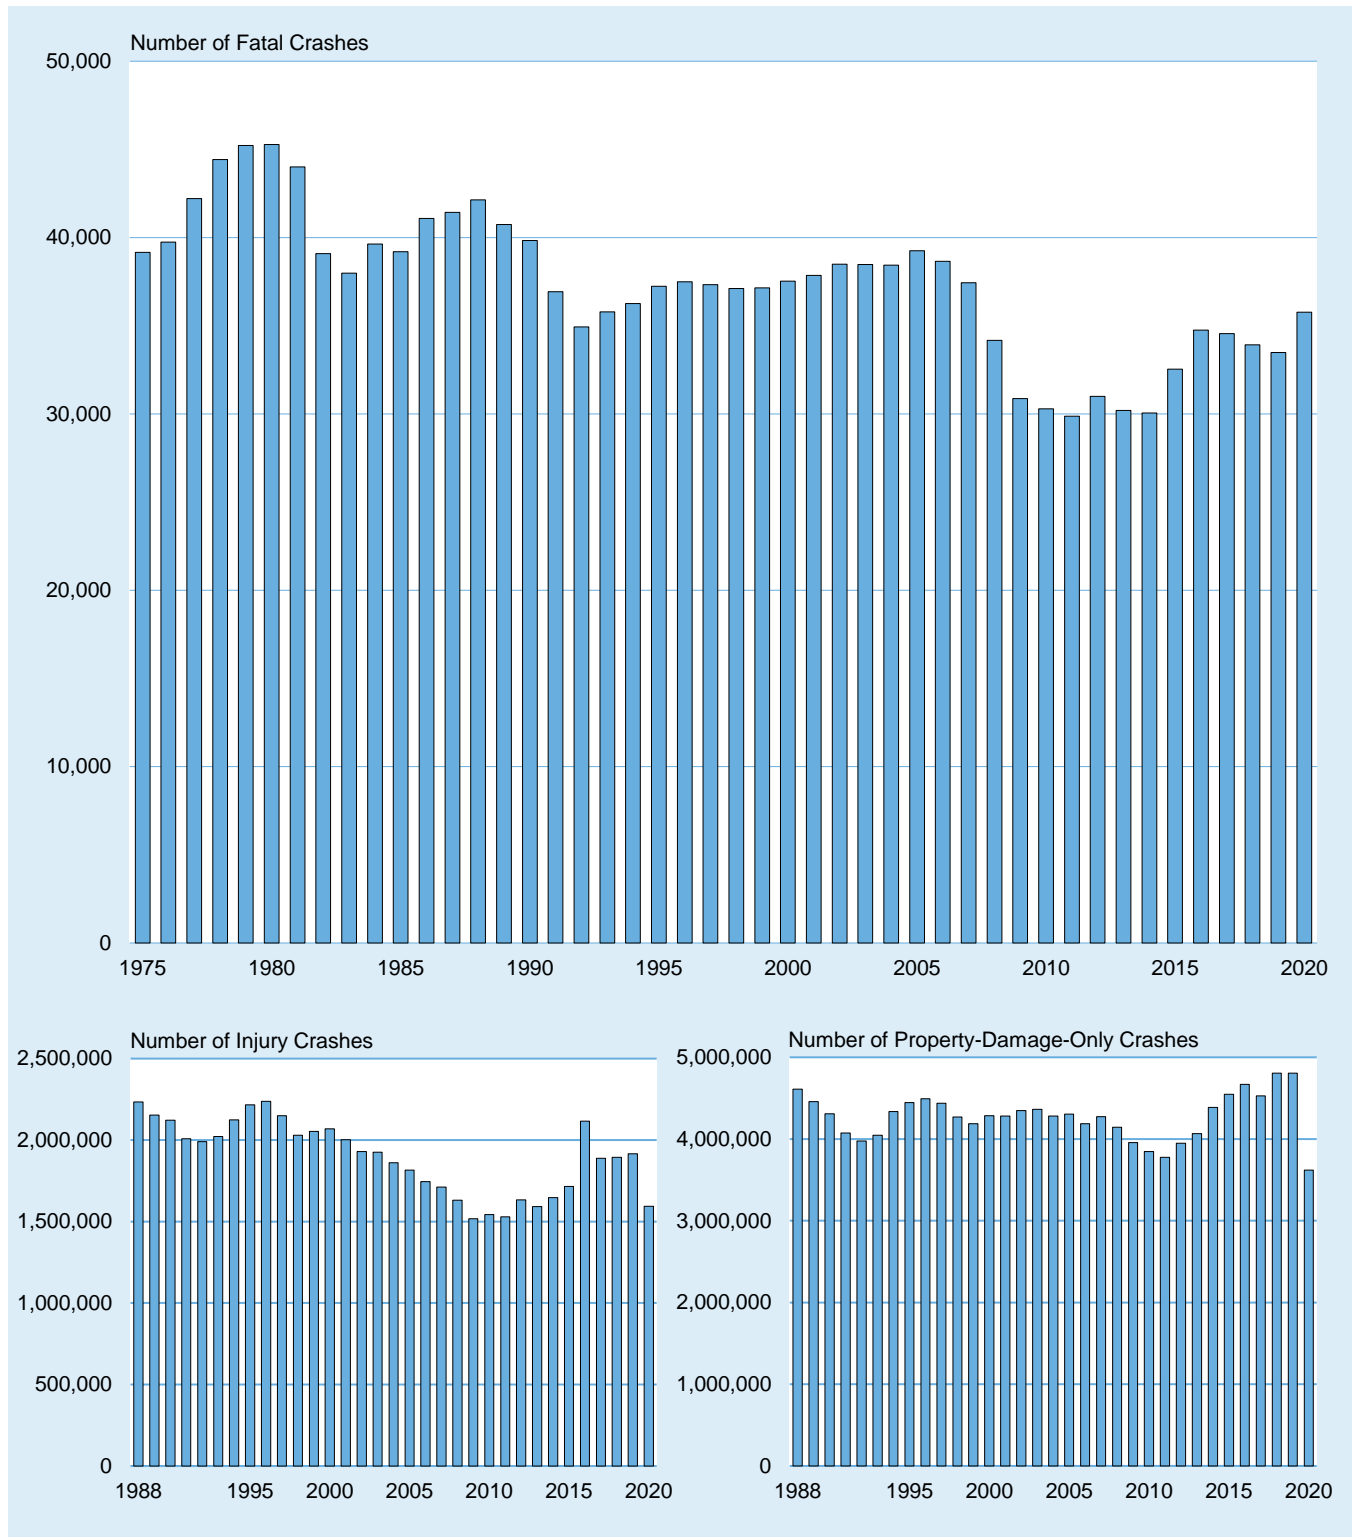

# CHAPTER 1: TRENDS

The tables in this chapter present statistics about police-reported motor vehicle crashes over time. Trends for fatal crashes and fatalities generally are presented from 1975 (when FARS began operation) to 2020; however, tables with alcohol data from FARS show data only for the years this data are available— 1982 to 2020. **Trends for nonfatal crashes are presented from NASS GES (1988 to 2015) and CRSS (2016 to 2020). Trends for people injured are presented from FARS (1988 to 2020) and NASS GES (1988 to 2015) or CRSS (2016 to 2020). NASS GES should not be compared to CRSS data.** Furthermore, care should be taken when comparing nonfatal crash and injury statistics from one year to the next. Since the statistics derived from NASS GES and CRSS data are estimates, year-to-year differences may be the result of the sampling process, not the result of an actual trend. The variability or sampling errors associated with the estimates must be considered when making any year-to-year comparisons using NASS GES or CRSS data (for more information on sampling error, see Appendix C). Below are some of the statistics you will find in this chapter:

- Fatal crashes increased by 6.8 percent from 2019 to 2020, and the fatality rate increased to 1.34 fatalities per 100 million VMT in 2020.
- The injury rate decreased by 6.0 percent from 2019 to 2020, to 79 people injured per 100 million VMT.
- The occupant fatality rate (including motorcyclists) per 100,000 population has declined by 43 percent from 1975 to 2020.
- The occupant injury rate (including motorcyclists) per 100,000 population, which declined by 45 percent from 1988 to 2015, decreased by 26 percent from 2016 to 2020.
- The nonoccupant fatality rate per 100,000 population has declined by 41 percent from 1975 to 2020.
- The nonoccupant injury rate per 100,000 population, which declined by 51 percent from 1988 to 2015, decreased by 37 percent from 2016 to 2020.
- The percent of alcohol-impaired-driving fatalities has declined from 48 percent in 1982 to 30 percent in 2020.

# Chapter 1: Trends

**Figure 1. Crashes, by Crash Severity, 1975-2020**

**Table 1. Crashes, by Crash Severity, 1988-2020**

Year	Crash Severity						Total Crashes	
	Fatal		Injury		Property Damage Only		Number	Percent
	Number	Percent	Number	Percent	Number	Percent		
1988	42,130	0.6	2,233,321	32.4	4,611,349	67.0	<b>6,886,800</b>	<b>100.0</b>

Sources: VMT and Licensed Drivers—FHWA; Registered Vehicles, 1966-1974—FHWA; Registered Vehicles, 1975-2020—FHWA and Polk data from R. L. Polk & Co., a foundation of IHS Markit automotive solutions; Population—Census Bureau; Traffic Deaths, 1966-1974—National Center for Health Statistics, D.H.H.S., State Accident Summaries (adjusted to 30-day traffic deaths by NHTSA); Traffic Deaths, 1975-2020—FARS, NHTSA, 30-day traffic deaths

Notes: Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Due to an enhancement in the registration data provided by R. L. Polk & Co., a foundation of IHS Markit automotive solutions, for 2011 and later years, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle 2010 and earlier years with those for 2011 and later years. For more details, see pages 10-11 of this report.

**Table 2. People Killed and Injured and Fatality and Injury Rates per Population, Licensed Drivers, Registered Vehicles, and VMT, 1966-2020 (Continued)**

Year	Injured	Population	Injured						
			Injury Rate per 100,000 Population	Licensed Drivers	Injury Rate per 100,000 Licensed Drivers	Registered Motor Vehicles	Injury Rate per 100,000 Registered Vehicles	VMT (millions)	Injury Rate per 100 Million VMT

Sources: VMT and Licensed Drivers—FHWA; Registered Vehicles 1988-2020—FHWA and Polk data from R. L. Polk & Co., a foundation of IHS Markit automotive solutions; Population—Census Bureau; People Injured—FARS and NASS GES/CRSS

Notes: Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Due to an enhancement in the registration data provided by R. L. Polk & Co., a foundation of IHS Markit automotive solutions, for 2011 and later years, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle 2010 and earlier years with those for 2011 and later years. For more details, see pages 10-11 of this report. Estimates for people injured from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

Sources: VMT—FHWA, revised by NHTSA for passenger cars and light trucks; Registered Passenger Cars and Light Trucks—Polk data from R. L. Polk & Co., a foundation of IHS Markit automotive solutions; Registered Large Trucks and Motorcycles—FHWA

Notes: See Tables 7 to 10 for notes regarding an enhanced methodology used to estimate registered vehicles and VMT for 2007 and after. Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Due to an enhancement in the passenger car and light truck registration data provided by R. L. Polk & Co. for 2011 and later years, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle for 2010 and earlier years with those for 2011 and later years. For more details, see pages 10-11 of this report.

Sources: VMT—FHWA, revised by NHTSA for passenger cars and light trucks; Registered Passenger Cars and Light Trucks—Polk data from R. L. Polk & Co., a foundation of IHS Markit automotive solutions; Registered Large Trucks and Motorcycles—FHWA

Notes: See Tables 7 to 10 for notes regarding an enhanced methodology used to estimate registered vehicles and VMT for 2007 and after. Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Due to an enhancement in the passenger car and light truck registration data provided by R. L. Polk & Co. for 2011 and later years, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle for 2010 and earlier years with those for 2011 and later years. For more details, see pages 10-11 of this report. Estimates for vehicles involved in injury and property-damage-only crashes from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

**Table 3. Vehicles Involved in Crashes and Involvement Rates per VMT and per Registered Vehicle, by Vehicle Type and Crash Severity, 1975-2020 (Continued)**

Year	Vehicle Type											
	Passenger Cars			Light Trucks			Large Trucks			Motorcycles		
	Number	Involvement Rate per 100 Million VMT	Involvement Rate per 100,000 Registered Vehicles	Number	Involvement Rate per 100 Million VMT	Involvement Rate per 100,000 Registered Vehicles	Number	Involvement Rate per 100 Million VMT	Involvement Rate per 100,000 Registered Vehicles	Number	Involvement Rate per 100 Million VMT	Involvement Rate per 100,000 Registered Vehicles

Source: Licensed Drivers—FHWA

Notes: Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Estimates for drivers involved in injury and property-damage-only crashes from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

## Chapter 1: Trends

**Table 5. Drivers Involved in Crashes and Involvement Rates per Licensed Driver, by Sex and Crash Severity, 1975-2020 (Continued)**

Year	Sex						Total (>15 Years Old)		
	Male (>15 Years Old)			Female (>15 Years Old)			Number Involved in Crashes	Licensed Drivers	Involvement Rate per 100,000 Licensed Drivers
	Number Involved in Crashes	Licensed Drivers	Involvement Rate per 100,000 Licensed Drivers	Number Involved in Crashes	Licensed Drivers	Involvement Rate per 100,000 Licensed Drivers

Sources: VMT—FHWA, revised by NHTSA; Registered Passenger Cars—R. L. Polk & Co., a foundation of IHS Markit automotive solutions

\*Injury data not available before 1988.

Notes: In 2011 the FHWA implemented an enhanced methodology for estimating registered vehicles and VMT by vehicle type. These revisions were applied to data from 2007 and later. In some cases, the changes were significant and should be taken into account when comparing registered vehicle counts and/or VMT for 2006 and earlier years with the numbers for 2007 and later years. Due to an enhancement in the passenger vehicle registration data provided by R. L. Polk & Co. for 2011 and later, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicles for passenger cars for 2010 and earlier years with those for 2011 and later years. For more details, see pages 10-11 of this report. Estimates for people injured from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

Sources: VMT—FHWA, revised by NHTSA; Registered Light Trucks—R. L. Polk & Co., a foundation of IHS Markit automotive solutions

\*Injury data not available before 1988.

Notes: In 2011 the FHWA implemented an enhanced methodology for estimating registered vehicles and VMT by vehicle type. These revisions were applied to data from 2007 and later. In some cases, the changes were significant and should be taken into account when comparing registered vehicle counts and/or VMT for 2006 and earlier years with the numbers for 2007 and later years. Due to an enhancement in the passenger vehicle registration data provided by R. L. Polk & Co. for 2011 and later, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicles for passenger cars for 2010 and earlier years with those for 2011 and later years. For more details, see pages 10-11 of this report. Estimates for people injured from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

Source: Registered Motorcycles and VMT—FHWA

\*Injury data not available before 1988.

Notes: In 2011 the FHWA implemented an enhanced methodology for estimating registered vehicles and VMT by vehicle type. These revisions were applied to data from 2007 and later. In some cases, the changes were significant and should be taken into account when comparing registered vehicle counts and/or VMT for 2006 and earlier years with the numbers for 2007 and later years. For more details, see pages 10-11 of this report. Estimates for people injured from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

2020	153 (1)	49	406 (3)	41	493 (3)	41

\*Highest BAC among drivers involved in the crash was .08 g/dL or greater. NHTSA estimates alcohol involvement when alcohol test results are unknown. For more details, see page 9 of this report.

\*\*The number of whole days in the holiday period is shown in parentheses. The length of the holiday period depends on the day on which the legal holiday falls, as follows:

- If the holiday falls on Monday, the holiday period is from 6 p.m. Friday to 5:59 a.m. Tuesday.
- If the holiday falls on Tuesday, the holiday period is from 6 p.m. Friday to 5:59 a.m. Wednesday.
- If the holiday falls on Wednesday, the holiday period is from 6 p.m. Tuesday to 5:59 a.m. Thursday.
- If the holiday falls on Thursday, the holiday period is from 6 p.m. Wednesday to 5:59 a.m. Monday.
- If the holiday falls on Friday, the holiday period is from 6 p.m. Thursday to 5:59 a.m. Monday.
- Number of days and number of hours incorporated: 1 day (36 hours), 2 days (60 hours), 3 days (84 hours), 4 days (108 hours).

\*\*\*No data available.

**Table 14. People Killed and Percentage Alcohol-Impaired Driving During Holiday Periods, 1982-2020 (Continued)**

Year	Holiday Period**					
	Labor Day		Thanksgiving		Christmas	
	Killed	Percentage Alcohol-Impaired Driving*	Killed	Percentage Alcohol-Impaired Driving*	Killed	Percentage Alcohol-Impaired Driving*

Notes: Restraint use is determined by police and may be overreported for survivors. Estimates for drivers involved in injury and property-damage-only crashes from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

## Chapter 1: Trends

Notes: Restraint use is determined by police and may be overreported for survivors. Estimates for people injured from 1988-2015 and 2016 and later are not comparable because NASS GES and CRSS have different sample designs. For more details, see page 9 of this report.

\*Includes occupants of other and unknown light trucks.

Chapter 2

# CRASHES

## CHAPTER 2: CRASHES

---

This chapter presents statistics about police-reported motor vehicle crashes according to the most severe injury in the crash: **Fatal**, **Injury** (Nonfatal), and **Property Damage** (No Injury). The tables and figures are presented in four groups: Time, Location, Circumstances, and Alcohol. Below are some of the crash statistics you will find in this section:

- More than 5.2 million police-reported motor vehicle crashes occurred in the United States in 2020. Thirty percent of those crashes (1.6 million) resulted in an injury, and fewer than 1 percent (35,766) resulted in a death.
- Nine p.m. to 11:59 p.m. and 6 p.m. to 8:59 p.m. on Saturdays proved to be the deadliest 3-hour periods throughout 2020, with 1,158 and 1,122 fatal crashes, respectively.
- Fifty-eight percent of fatal crashes involved only one vehicle, as compared with 33 percent of injury crashes and 32 percent of property-damage-only crashes.
- Collision with another motor vehicle in transport was the most common first harmful event for fatal, injury, and property-damage-only crashes. Collisions with fixed objects and noncollisions accounted for only 20 percent of all crashes, but they accounted for 39 percent of fatal crashes.
- Thirty percent of all fatal crashes involved alcohol-impaired driving, where the highest BAC among drivers involved in the crash was .08 g/dL or higher. For fatal crashes occurring from midnight to 2:59 a.m., 55 percent involved alcohol-impaired driving.

## Chapter 2: Crashes

\*Highest BAC among drivers involved in the crash was .08 g/dL or greater.

Chapter 3

# VEHICLES

## CHAPTER 3: VEHICLES

---

Statistics about the vehicles involved in police-reported motor vehicle crashes are presented in this chapter, according to six major vehicle types: Passenger Cars, Light Trucks (including pickups, vans, and utility vehicles with a GVWR of 10,000 pounds or less), Large Trucks (including single-unit trucks and truck tractors with a gross vehicle weight rating of more than 10,000 pounds), Motorcycles (including motorcycles, mopeds, and motor scooters), Buses (including school buses and transit buses), and Other Vehicles (including all-terrain vehicles, farm and construction equipment, and motorhomes). The tables and figures are presented for all vehicle types first, then by individual vehicle type. Below are some of the vehicle statistics you will find in this section:

- Ninety-three percent of the 9.1 million vehicles involved in motor vehicle crashes in 2020 were passenger cars or light trucks.
- Large trucks accounted for 8.9 percent of the vehicles in fatal crashes, but only 3.8 percent of the vehicles involved in injury crashes and 5.2 percent of the vehicles involved in property-damage-only crashes. Of the 4,842 large trucks involved in fatal crashes, 64.6 percent were combination trucks.
- The proportion of vehicles that rolled over in fatal crashes (17.0%) was more than 3 times as high as the proportion in injury crashes (4.6%) and more than 13 times as high as the proportion in property-damage-only crashes (1.3%).
- Compared with passenger cars, utility vehicles, vans, large trucks, and buses, pickup trucks experienced the highest rollover rate in fatal crashes (22.2%). Large trucks experienced the highest rollover rate in injury crashes (8.8%) and property-damage-only crashes (2.9%).
- Fires occurred in 0.2 percent of the vehicles involved in all traffic crashes in 2020. For fatal crashes, however, fires occurred in 3.5 percent of the vehicles involved.
- Regardless of crash severity, the majority of vehicles in single- and two-vehicle crashes were going straight prior to the crash. The next most common vehicle maneuver differed by crash severity: negotiating a curve for fatal crashes, turning left for injury crashes, and stopped in traffic lane for property-damage-only crashes.
- Motorcycles in fatal crashes had the highest proportion of collisions with fixed objects (24.6%), and buses in fatal crashes had the lowest proportion (2.6%).

Chapter 4

# PEOPLE

## CHAPTER 4: PEOPLE

---

This chapter presents statistics about the Drivers, Passengers, Pedestrians, and Pedalcyclists involved in police-reported motor vehicle crashes in 2020. The tables and figures are presented in nine groups: all killed and injured people, crash-involved drivers, occupants (drivers and passengers), alcohol, restraints, motorcycle-related, school-bus-related, pedestrians, and pedalcyclists. Below are some of the statistics you will find in this section:

- A total of 38,824 people lost their lives in motor vehicle crashes in 2020. Another 2.3 million people were injured.
- The majority of people killed and injured in traffic crashes were drivers (67%), followed by passengers (24%), motorcyclists (4%), pedestrians (3%), and pedalcyclists (2%).
- Per 100,000 population, people 21 to 24 years old had the highest fatality rate and the highest injury rate. Children 5 to 9 years old had the lowest fatality rate, and children under 5 years old had the lowest injury rate per 100,000 population.
- The fatality rate per 100,000 population was lower for females than for males. The injury rate based on population was higher for females in the younger age groups, but higher for males in the older age groups.
- Of the people who were killed in 2020 in traffic crashes, 30 percent died in alcohol-impaired-driving crashes.

## Chapter 4: People

Source: Licensed Drivers—FHWA

\*Includes drivers in fatal crashes of unknown sex.

\*\*Not applicable.

Notes: Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Totals may not equal sum of components due to independent rounding.

## Chapter 4: People

**Figure 22. Driver Involvement Rates per 100,000 Licensed Drivers, by Age Group, Sex, and Crash Severity**

**Table 63. Drivers Involved in Fatal Crashes, by Previous Driving Record and License Compliance**

Previous Convictions	Valid License (41,365)		Invalid License (9,559)		Total (50,924)	
	Number	Percent	Number	Percent	Number	Percent
Previous Recorded Crashes	7,381	17.8	1,689	17.7	<b>9,070</b>	<b>17.8</b>
Previous Recorded Suspensions or Revocations	3,754	9.1	3,424	35.8	<b>7,178</b>	<b>14.1</b>
Previous DWI Convictions	841	2.0	897	9.4	<b>1,738</b>	<b>3.4</b>
Previous Speeding Convictions	7,750	18.7	1,705	17.8	<b>9,455</b>	<b>18.6</b>
Previous Other Harmful Moving Convictions	7,084	17.1	2,331	24.4	<b>9,415</b>	<b>18.5</b>
Drivers with No Previous Convictions	22,595	54.6	3,978	41.6	<b>26,573</b>	<b>52.2</b>

Notes: Table does not include drivers with unknown license compliance. FARS records prior driving records (convictions only, not violations) for events occurring within 5 years of the date of the crash. The same driver can have one or more of these convictions. License compliance refers to the type of driver license possessed or not possessed by the driver for the class of vehicle being driven at the time of the crash.

**Table 64. Related Factors for Drivers Involved in Fatal Crashes**

Factors	Number	Percent
Driving too fast for conditions or in excess of posted speed limit.....	10,295	19.1
Under the influence of alcohol, drugs, or medication.....	6,246	11.6
Operating vehicle in a careless manner.....	3,958	7.3
Failure to yield right-of-way.....	3,663	6.8
Failure to keep in proper lane.....	3,337	6.2
Distracted (phone, talking, eating, object, etc.).....	2,968	5.5
Operating vehicle in erratic, reckless or negligent manner.....	2,356	4.4
Failure to obey traffic signs, signals, or officer.....	2,250	4.2
Overcorrecting/oversteering.....	1,744	3.2
Vision obscured (rain, snow, glare, lights, building, trees, etc.).....	1,533	2.8
Drowsy, asleep, fatigued, ill, or blackout.....	1,165	2.2
Swerving or avoiding due to wind, slippery surface, vehicle, object, non-motorist in roadway, etc.....	1,138	2.1
Driving wrong way on one-way trafficway or wrong side of road.....	1,060	2.0
Making improper turn.....	368	0.7
Other factors.....	5,921	11.0
None reported.....	8,659	16.1
Unknown.....	16,885	31.3
<b>Total Drivers.....</b>	<b>53,890</b>	<b>100.0</b>

Notes: The sum of the numbers and percentages is greater than total drivers as more than one factor may be present for the same driver.

Notes: Only includes crashes where the first harmful event was a collision with a pedalcyclist. Totals may not equal sum of components due to independent rounding.

**Table 105. Pedalcyclists Killed, by Related Factors**

Factors	Number	Percent
Failure to yield right-of-way.....	270	28.8
Failure to obey traffic signs, signals, or officer.....	103	11.0
Not visible (dark clothing, no lighting, etc.).....	91	9.7
Wrong-way riding.....	64	6.8
Making improper turn.....	59	6.3
Under the influence of alcohol, drugs, or medication.....	53	5.7
Inattentive (talking, eating, etc.).....	33	3.5
Operating without required equipment.....	28	3.0
Riding on wrong side of the road.....	26	2.8
Making improper entry or exit from trafficway.....	22	2.3
Improper lane usage.....	19	2.0
Failing to have lights on when required.....	13	1.4
Improper or erratic lane changing.....	11	1.2
Physical impairment.....	10	1.1
Erratic, reckless, careless, or negligent operation.....	6	0.6
Vision obscured (reflected glare, parked vehicle, sign, etc.).....	5	0.5
Darting or running into road.....	3	0.3
Improper passing.....	3	0.3
Traveling on prohibited trafficways.....	3	0.3
Portable electronics.....	3	0.3
In roadway improperly (standing, lying, working, playing).....	2	0.2
Passing with insufficient distance.....	2	0.2
Emotional (e.g., depression, angry, disturbed).....	1	0.1
Other factors.....	35	3.7
None reported.....	89	9.5
Unknown.....	274	29.2
<b>Total Pedalcyclists.....</b>	<b>938</b>	<b>100.0</b>

Note: The sums of the numbers and percentages are greater than total pedalcyclists killed as more than one factor may be present for the same pedalcyclist.

Chapter 5

# STATES

# CHAPTER 5: STATES

Fatal crash and fatality statistics for each of the 50 States, the District of Columbia, and Puerto Rico are presented in this chapter. Several tables display State fatality rates based on population, licensed drivers, and registered vehicles. The last page describes the States' occupant restraint and motorcycle helmet laws. Below are some of the State statistics you will find in this chapter:

- Traffic fatalities increased by 7 percent from 2019 to 2020 for the Nation as a whole. Seven States and Puerto Rico showed decreases, ranging from 4 percent to as much as 21 percent.
- The pedestrian fatality rate per 100,000 population was 1.98 for the Nation. New Mexico had the highest rate (3.75), and Maine had the lowest rate (0.67).
- About 2.4 percent of all traffic crash fatalities in 2020 were pedalcyclists. Montana and South Dakota reported no pedalcyclists killed.
- In 2020 there were 34 States, the District of Columbia, and Puerto Rico that had primary seat belt laws in effect and 15 States had secondary seat belt laws. Only one State (New Hampshire) has no seat belt law for adults.
- All 50 States, the District of Columbia, and Puerto Rico have laws requiring children of certain ages to be restrained in child safety seats.
- Motorcycle helmets were required for all riders in 19 States, the District of Columbia, and Puerto Rico in 2020. Twenty-eight States had helmet requirements with exceptions (age, rider type, roadway type), and 3 States (Illinois, Iowa, and New Hampshire) did not require helmets at all.
- In 2020 it was a criminal offense to operate a motor vehicle at a BAC of .08 g/dL or above in all 50 States, the District of Columbia, and Puerto Rico. Note: Utah set a lower threshold of .05 g/dL or higher that went into effect on December 30, 2018.

## Restraint Use and Motorcycle Helmet Use Laws

### *Restraint Use Laws*

The first mandatory belt use law was enacted in New York in 1984. Adult belt use laws are now in effect in 49 States, the District of Columbia, and Puerto Rico. The laws differ from State to State, according to the type and age of the vehicle, occupant age and seating position, etc. The goal of these laws is to promote belt use and thereby reduce deaths and injuries in motor vehicle crashes.

In 2020 there were 34 States, the District of Columbia, and Puerto Rico that had primary seat belt laws in effect, enabling law enforcement officers to stop vehicles and write citations when they observed violations of the seat belt law. In 15 States the laws specified secondary enforcement, meaning that law enforcement officers were permitted to write citations only after a vehicle was stopped for some other traffic infraction. New Hampshire is the only State without a seat belt law for adults, although it does have a primary child passenger safety law that covers all drivers and passengers under age 18.

The first mandatory child restraint use law was implemented in Tennessee in 1978. Since 1985 all 50 States and the District of Columbia have had child restraint use laws in effect. Child restraint use laws differ from State to State, in terms of the ages of children covered and in other important ways, including height and weight limits, seating position requirements, and various exemptions and exceptions.

The most current information on seat belt laws and child passenger safety laws is available on the Web site of the Governors Highway Safety Association (GHSA) at [www.ghsa.org](http://www.ghsa.org).

- Seat belt laws—[www.ghsa.org/html/stateinfo/laws/seatbelt\\_laws.html](http://www.ghsa.org/html/stateinfo/laws/seatbelt_laws.html)
- Child passenger safety laws—[www.ghsa.org/html/stateinfo/laws/childsafety\\_laws.html](http://www.ghsa.org/html/stateinfo/laws/childsafety_laws.html)

Due to the COVID-19 pandemic, NHTSA issued a waiver through the Coronavirus Aid, Relief, and Economic Security (CARES) Act related to conducting 2020 seat belt use surveys. This waiver enabled States and U.S. Territories to use their 2019 seat belt use rate for their 2020 seat belt use rate. In 2020 seat belt use rates in the United States ranged from 68.3 percent in South Dakota to 97.1 percent in Hawaii. Twenty-four States and the District of Columbia achieved belt use rates of 90.0 percent or higher. These results are from probability-based observational surveys conducted by 50 States, the District of Columbia, and U.S. Territories. The nationwide seat belt use rate in 2020 was 90.3 percent, as measured by NHTSA's National Occupant Protection Use Survey (NOPUS). NOPUS is a national probability-based survey, which is independent from State belt use surveys. Observed seat belt use rates for the States and the Nation in 2020 can be found in *Seat Belt Use in 2020—Use Rates in the States and Territories*.<sup>4</sup>

### *Motorcycle Helmet Use Laws*

In 2020 there were 19 States, the District of Columbia, and Puerto Rico that required helmet use by all motorcyclists. Missouri is included in the 19 States even though their helmet law changed in August 2020 to only require helmets for a subset of motorcyclist. In 28 States helmet use was required for only a subset

<sup>4</sup> National Center for Statistics and Analysis. (2021, April). *Seat belt use in 2020 — Use rates in the States and Territories* (Traffic Safety Facts Crash•Stats. Report No. DOT HS 813 109). National Highway Traffic Safety Administration. <https://crashstats.nhtsa.dot.gov/Api/Public/ViewPublication/813109>

## Chapter 5: States

---

of motorcyclists (typically, motorcyclists under age 18), and three States (Illinois, Iowa, and New Hampshire) do not require helmet use for motorcyclists of any age.

The most current information on helmet use laws is available on the GHSA Web site at [www.ghsa.org/state-laws/issues/motorcyclists](http://www.ghsa.org/state-laws/issues/motorcyclists).

According to results from NOPUS, the overall rate of DOT-compliant motorcycle helmet use in the United States was 69.0 percent in 2020. Helmet use continued to be significantly higher in States that required all motorcyclists to be helmeted than in other States. In 2020 DOT compliant motorcycle helmet use in States requiring all to use helmets was 84.0 percent compared to 54.4 percent in other States. Information on motorcycle helmet use in 2020 can be found in *Motorcycle Helmet Use in 2020—Overall Results*.<sup>5</sup>

# APPENDICES

# APPENDIX A: FARS DATA ELEMENTS

## 2020 Fatality Analysis Reporting System Data Elements

### Crash Level

Arrival Time EMS	Number of Forms Submitted for Persons Not in Motor Vehicles
Atmospheric Conditions	Number of Motor Vehicle Occupant Forms Submitted
City	Number of Vehicle Forms Submitted
County	Rail Grade Crossing Identifier
Crash Date	Related Factors—Crash Level
Crash Events	Relation to Junction
Crash Time	Relation to Trafficway
EMS Time at Hospital	Road Ownership
First Harmful Event	Route Signing
Global Position	School-Bus-Related
Land Use and Functional System	Special Jurisdiction
Light Condition	State
Manner of Collision	Trafficway Identifier
Milepoint	Type of Intersection
National Highway System	Work Zone
Notification Time EMS	

### Vehicle Level

Areas of Impact—Initial Contact Point	Registered Vehicle Owner
Areas of Impact—Damaged Areas	Registration State
Attempted Avoidance Maneuver	Related Factors—Vehicle Level
Body Type	Roadway Alignment
Bus Use	Roadway Grade
Cargo Body Type	Roadway Surface Conditions
Contributing Circumstances, Motor Vehicle	Roadway Surface Type
Crash Type	Rollover
Critical Event	Sequence of Events
Device Functioning	Special Use
Emergency Motor Vehicle Use	Speed Limit
Extent of Damage	Total Lanes in Roadway
Final Stage Body Class	Traffic Control Device
Fire Occurrence	Trafficway Description
Gross Vehicle Weight Rating, Power Unit	Trailer Vehicle Identification Number
Gross Vehicle Weight Rating, Trailer	Travel Speed
Hazardous Material Involvement/Placard	Underride/Override
Hit-and-Run	Unit Type
Jackknife	Vehicle Configuration
Location of Rollover	Vehicle Identification Number
Most Harmful Event	Vehicle Make
Motor Carrier Identification Number	Vehicle Model
Number of Occupants	Vehicle Model Year
Pre-Event Movement	Vehicle Number
(Prior to Recognition of Critical Event)	Vehicle Removal
Pre-Impact Location	Vehicle Trailing
Pre-Impact Stability	

## Appendix A: FARS Data Elements

### 2020 Fatality Analysis Reporting System Data Elements (Continued)

#### Driver Level

Commercial Motor Vehicle License Status	Driver's ZIP Code
Compliance with Commercial Driver's License (CDL) Endorsements	License Compliance with Class of Vehicle
Compliance with License Restrictions	Non-CDL License Type/Status
Condition (Impairment) at Time of Crash	Previous DWI Convictions
Date of Oldest Crash, Suspension, Conviction	Previous Other Moving Violation Convictions
Date of Most Recent Crash, Suspension, Conviction	Previous Recorded Crashes
Driver Distracted By	Previous Recorded Suspensions, Revocations, and Withdrawals
Driver Height	Previous Speeding Convictions
Driver Maneuvered to Avoid	Related Factors—Driver Level
Driver Presence	Speeding-Related
Driver Weight	Vehicle Number
Driver's License State	Violations Charged
Driver's Vision Obscured By	

#### Person (Motor Vehicle Occupant) Level

Age	Method of Alcohol Determination by Police
Air Bag Deployed	Method of Drug Determination by Police
Alcohol Test	Number
Any Indication of Misuse—Restraint System/ Helmet Use	Person Number
Death Date	Person Type
Death Time	Police-Reported Alcohol Involvement
Died at Scene/En Route	Police-Reported Drug Involvement
Drug Test	Race/Hispanic Origin
Ejection	Related Factors—Person
Ejection Path	(Motor Vehicle Occupant) Level
Extrication	Restraint System
Fatal Injury at Work	Seating Position
Helmet Use	Sex
Injury Severity	Transported to First Medical Facility By

#### Person (Not Motor Vehicle Occupant) Level

Age	Non-Motorist Location at Time of Crash
Alcohol Test	Non-Motorist Safety Equipment
Condition (Impairment) at Time of Crash	Pedestrian/Bike Typing
Death Date	Person Number
Death Time	Person Type
Died at Scene/En Route	Police-Reported Alcohol Involvement
Drug Test	Police-Reported Drug Involvement
Fatal Injury at Work	Race/Hispanic Origin
Injury Severity	Related Factors—Person
Method of Alcohol Determination by Police	(Not a Motor Vehicle Occupant) Level
Method of Drug Determination by Police	Sex
Non-Motorist Action/Circumstances at Time of Crash	Transported to First Medical Facility By
Non-Motorist Action/Circumstances Prior to Crash	Vehicle Number of Motor Vehicle Striking
Non-Motorist Distracted By	Non-Motorist

# APPENDIX B: CRSS DATA ELEMENTS

## 2020 Crash Report Sampling System Data Elements

### Crash Level

Atmospheric Conditions	Related Factors—Crash Level
Crash Events	Relation to Junction
Crash Month	(Non-Interchange vs. Interchange)
Crash Time	Relation to Junction (Specific Location)
First Harmful Event	Relation to Trafficway
Interstate Highway	School-Bus-Related
Light Condition	Type of Intersection
Manner of Collision	Urbanicity
Number of Non-Motorists	Work Zone
Number of Vehicle Forms Submitted	

### Vehicle Level

Areas of Impact—Initial Contact Point	Pre-Event Movement
Areas of Impact—Damaged Areas	(Prior to Recognition of Critical Event)
Attempted Avoidance Maneuver	Pre-Impact Location
Body Type	Pre-Impact Stability
Bus Use	Related Factors—Vehicle Level
Cargo Body Type	Roadway Alignment
Contributing Circumstances, Motor Vehicle	Roadway Grade
Corrective Action Attempted	Roadway Surface Conditions
Crash Type	Rollover
Critical Event	Sequence of Events
Device Functioning	Special Use
Emergency Motor Vehicle Use	Speed Limit
Extent of Damage	Total Lanes in Roadway
Final Stage Body Class	Traffic Control Device
Fire Occurrence	Trafficway Description
Gross Vehicle Weight Rating, Power Unit	Travel Speed
Gross Vehicle Weight Rating, Trailer	Unit Type
Hazardous Material Involvement/Placard	Vehicle Configuration
Hit-and-Run	Vehicle Identification Number
Jackknife	Vehicle Make
Location of Rollover	Vehicle Model
Most Harmful Event	Vehicle Model Year
Motor Carrier Identification Number	Vehicle Number
Number of Occupants	Vehicle Removal
Number of Occupants Coded	Vehicle Trailing

Non-Motorist Location at Time of Crash	Transported to First Medical Facility By
Non-Motorist Safety Equipment	Vehicle Number of Motor Vehicle Striking
Pedestrian/Bike Typing	Non-Motorist

# APPENDIX C: CRSS TECHNICAL NOTES

## Standard Errors

The estimates generated using CRSS data are subject to sampling errors, because they are based on a probability sample of crashes instead of all crashes. The sampling error is a measure of the variability of an estimator from its mean under repeated sample selections. The magnitude of the sampling error depends on the study variable, the estimator used, and the CRSS sample design.

The CRSS sample was selected with design features such as stratification, clustering, and unequal selection probabilities (see *Crash Report Sampling System: Sample Design and Weighting*<sup>2</sup> for more details). As a result, the CRSS sample is not a simple random sample. Failing to consider these design features in the estimation can cause bias in both the CRSS point estimates and the associated standard error estimates.

Estimation methods and computer software have been developed in order to make estimates from complex survey data like CRSS. Specialized procedures for analysis of complex survey data, such as SAS PROC SURVEY procedures and SUDAAN procedures, should be used for CRSS data analysis, along with proper design statements. See *Crash Report Sampling System: Design Overview, Analytic Guidance, and FAQs*<sup>3</sup> for some basic concepts of complex survey data analysis and examples.

For readers who do not have access to the specialized software, the generalized variance function (GVF) method can be used to generate ballpark standard error estimates for a large quantity of estimates in a simpler way. With the GVF, readers can plug in the point estimate and calculate its estimated standard error directly. In Traffic Safety Facts annual reports for prior years, NHTSA published separate GVF estimates for the NASS GES crash, vehicle, and people characteristics. For more information see Appendix C of *National Automotive Sampling System (NASS) General Estimates System (GES) Analytical User's Manual 1988-2015*.<sup>6</sup> Information on the GVFs for CRSS, which replaced NASS GES in 2016, can be found in Appendix C of *Crash Report Sampling System: Generalized Variance Functions*<sup>7</sup> and Appendix F of *Crash Report Sampling System Analytical User's Manual, 2016-2020*.<sup>8</sup>

## Appendix C: CRSS Technical Notes

### Unknowns

CRSS data are obtained either directly from an item on the PCR or by interpreting the information provided in the report through reviewing the crash diagram, the officer’s written summary of the crash, or combinations of variables on the PCR. Because of this interpretation, and because the police officer may not have entered some item of information or provided complete information, data can be missing. Prior to 2010 data, two different statistical procedures were used on NASS GES data to complete values for unknown data. These procedures, univariate and hot-deck imputation, are described in a technical report available from NCSA, *Imputation in the NASS General Estimates System*.<sup>9</sup>

Starting with 2010 data and continuing when CRSS replaced NASS GES, a different statistical procedure called imputation by sequential regression replaced the univariate and hot-deck imputation procedures. Imputation by sequential regression uses a software package called IVEware that was developed by the University of Michigan. In this procedure, covariates are selected automatically using the stepwise regression method before the unknown values are imputed. The only exception is vehicle body type, where its unknown values have been imputed by the univariate and hot-deck imputation procedures. Table C1 below gives the reader the proportions of unknown values prior to imputation for variables with imputed values for 2020.

**Table C1. Percentage of Unknowns for 2020 CRSS Data Elements**

Crash Level			
Atmospheric Condition .....	5.7%	Light Condition.....	1.3%
Crash Severity.....	3.4%	Manner of Collision .....	0.2%
Day of Week.....	0.0%	Minute of Crash .....	0.8%
First Harmful Event.....	<0.1%	Relation to Junction—Specific Location .....	8.0%
Hour of Crash.....	0.8%	Relation to Trafficway .....	<0.1%
Vehicle/Driver Level			
Initial Point of Impact .....	2.4%	Speed Limit.....	14.3%
Most Harmful Event.....	<0.1%	Traffic Control Device .....	14.9%
Roadway Surface Condition .....	6.2%	Vehicle Body Type.....	2.2%
Person Level			
Age .....	8.8%	Seating Position.....	1.4%
Injury Severity .....	4.4%	Sex.....	5.3%

Note: For some data elements, counts for the CRSS category “Not Reported” were combined with counts for “Unknown” in the frequencies above.

**Location**, 152, 157

## M

**Manner of Collision**, 76, 119

**Month**, 70

**Most Harmful Event**, 95, 99, 101, 105, 107, 130

### Motorcycle

- Age Group, 32, 33, 128, 136, 137, 138, 139, 150
- Alcohol, 52, 136, 137, 138, 139, 140
- Crash Type, 96, 106
- Day of Week, 138, 139, 148
- Helmet Use, 150
- Helmet Use Laws, 209, 210
- Impact Point, 96, 105, 106
- License Compliance, 123, 150
- Most Harmful Event, 95, 105, 130
- Occupant, 32, 33, 112, 124, 127, 128, 130, 180, 181
- Rates, 23, 24, 25, 32, 33, 40, 41
- State, 176, 177, 180, 181
- Time of Day, 138, 139, 148
- Year, 23, 24, 25, 32, 33, 40, 41, 52

## N

**Number of Lanes**, 89

### Nonoccupant

- Age Group, 44, 45
- Injury Severity, 112
- Person Type, 26, 27, 42, 43, 112, 118, 136, 151
- Vehicle Type, 26, 27, 118
- Year, 26, 27, 42, 43, 44, 45

## O

### Occupant

- Age Group, 32, 33, 128, 129, 142, 143
- Ejection, 132
- Injury Severity, 112, 124
- Person Type, 26, 27, 42, 43, 112, 118, 124, 129, 136, 151
- Restraint Use, 63, 64, 142, 143, 144, 146, 182, 183
- Restraint Use Laws, 209
- Sex, 127, 129

Vehicle Type, 26, 27, 65, 124, 127, 128, 130, 132, 146, 147, 180, 181, 184, 185  
 Year, 26, 27, 32, 33, 34, 35, 36, 37, 38, 39, 42, 43, 63, 64, 65

## P

**Passenger**, 112, 118, 124, 129, 136, 150, 151, 176, 177

### Passenger Car

Alcohol, 52, 140  
 Crash Type, 96, 98, 147  
 Ejection, 132  
 Impact Point, 96, 98, 157, 161  
 Most Harmful Event, 95, 130  
 Occupant, 26, 27, 34, 35, 63, 64, 65, 124, 127, 128, 130, 132, 142, 143, 144, 146, 147, 180, 181, 182, 183, 184, 185  
 Rates, 23, 24, 25, 34, 35  
 Restraint Use, 60, 61, 62, 63, 64, 142, 143, 144, 146, 182, 183  
 Rollover, 65, 90, 91, 147, 184, 185  
 Seating Position, 144  
 State, 180, 181, 182, 183, 184, 185  
 Year, 23, 24, 25, 26, 27, 34, 35, 52, 60, 61, 62, 63, 64, 65

### Pedalcyclist

Age Group, 157, 158  
 Alcohol, 136  
 Day of Week, 159  
 Impact Point on Striking Vehicle, 160  
 Injury Severity, 112  
 Location, 157  
 Rates, 158  
 Related Factors, 161  
 Sex, 158  
 State, 176, 177  
 Time of Day, 159  
 Year, 26, 27

### Pedestrian

Age Group, 152, 153  
 Alcohol, 59  
 City, 202, 203, 204, 205, 206  
 Day of Week, 154  
 Impact Point on Striking Vehicle, 156  
 Injury Severity, 112

Location, 152  
 Rates, 153, 186, 187, 202, 203, 204, 205, 206  
 Related Factors, 156  
 School-Bus-Related, 151  
 Sex, 153  
 State, 176, 177, 186, 187, 202, 203, 204, 205, 206  
 Time of Day, 154  
 Year, 26, 27, 59

### Police Vehicle, 118

### Population

Age, 32, 33, 114, 115, 153, 158  
 City, 202, 203, 204, 205, 206  
 Rates, 20, 21, 32, 33, 114, 115, 153, 158, 174, 175, 186, 187, 202, 203, 204, 205, 206  
 Sex, 114, 115, 153, 158  
 State, 174, 175, 186, 187, 202, 203, 204, 205, 206  
 Year, 20, 21, 32, 33

### Previous Driving Record, 123

## R

### Rates

Licensed Drivers  
 Age Group, 121, 122  
 Sex, 28, 29, 30, 31, 121, 122

\*Estimated reductions in deaths that resulted from the presence of laws establishing a minimum legal age of 21 years for the consumption of alcoholic beverages.

The table above presents estimates of the lives saved in 2017 and previous years (2018 to 2020 not available) by various protective devices or laws. The estimates were obtained by combining information from fatal traffic crashes with estimates of the effectiveness of each device or law in saving lives. For seat belts and motorcycle helmets, the table also estimates the numbers of additional lives that could have been saved if the devices had been used by more people.
